

PHONES FOR HOMES.

British
TELECOM

INTRODUCTION

Introducing phones you've never known but always wanted.

In fact a whole range of new look, new concept British Telecom phones.

More sophisticated, more streamlined, more colourful, more stylish, more fun.

In hues to enthuse all kinds of tastes. Naturals, pastels, bold and bright.

All with the new style plug for instant mobility, because it plugs in wherever you want it.

For information on the full range, read on.

KEYWORD DEFINITIONS

ALARM

An ingenious 12-hour alarm clock that can be programmed to remind you of important engagements or even to wake you up at the required time.

AUTOMATIC RECHARGE

Once the handset is replaced on the base unit the phone is automatically recharged for your next cordless call.

CALL PROGRESS MONITOR

The call progress monitor enables you to dial your number without having to lift the handset until the moment you hear you're through.

CALL SCREENING

If you are actually in but busy you can listen to your answering machine taking calls, and then chose to reply personally once the caller has been identified.

CALL TIMER

A cost effective device to time your calls for you and stop you running up large bills. Helpful for enabling you to work out who owes what to the telephone bill at the end of the quarter.

CARRY RECESS

A handy recess on the base unit to enable easy carriage of the telephone around the room.

CLOCK

Digital display shows clock when phone not in use.

CORDLESS TELEPHONE

A cordless telephone transmits telephone calls via a radio frequency, thereby enabling you to walk around the house or garden without missing calls. Range up to 100 metres under ideal conditions.

FOLLOW-ON CALL FACILITY ('Cancel' Button)

Allows the user to clear the telephone line without having to switch back to standby. Saves time for when making consecutive calls.

HANDSET DIAL

A press-button dial built into the handset as opposed to the more traditional place on the base unit.

'HANDS FREE' OPERATION

An inbuilt loudspeaker facility and microphone lets you make and receive calls while leaving your hands free to take notes, and allows your family to share and join in your telephone discussion.

HI-LO VOLUME

A volume control which enables you to increase or decrease the volume of your call.

LAST NUMBER REDIAL

The phone will automatically redial the last number you called at the touch of a button or two, invaluable for those numbers which seem to be constantly engaged.

MEMORY STORE

An invaluable electronic storage facility incorporated within the phone to store and call your most often dialled numbers at the touch of a button or two.

NOTE PAD FACILITY (NEXT NUMBER STORE)

A special electronic memory facility which will store the next number you wish to use. Very handy when obtaining numbers from directory enquiries.

ONE PIECE

An all-in-one telephone incorporating both the handset and the base unit in a single instrument – you never have to return the handset to the base unit because there isn't one. Saves space.

ON-HOOK DIALLING

A built-in loudspeaker allows you to dial with the receiver 'on the hook' and continue working until the call is connected. The receiver is then lifted to speak.

PAGING DEVICE

Essential for when you're working away from the base unit. Anyone requiring you can simply press a button on the base unit and signal you.

PHONE SOCKET

A neat wall 'box' containing an outlet for a telephone line which is connected instantly when the special plug from any modern telephone device is inserted.

DECORATOR

GENIE

- compact, lightweight, with a pleasingly rounded profile
- adds a special magic in the home – bedroom, lounge or study
- press-button dialling
- last number redial
- secrecy button
- adjustable tone caller
- available in peach, antique white, blue/white or red

CANDLESTICK

- a little piece of telephone history returns in the unique shape of the Candlestick
- separate earpiece and mouthpiece
- no integral bell – makes perfect extension telephone – ideal upstairs if you don't want the children woken up at night
- add-on bell unit available
- available in black or white with gilded trim

RONDO

- luxury, quality phone with wood finish base and brass trim
- press-button dialling
- last number redial
- secrecy button for those private little asides
- adjustable bell

PICTUREPHONE

- wall-mounted phone
- lift off the clear plastic cover and change the scene to match your mood or room
- a must for the kitchen wall
- mirror or cork board conversion kits also available
- last number redial
- volume control on the tone caller

ANSWERING/RECORDING MACHINES

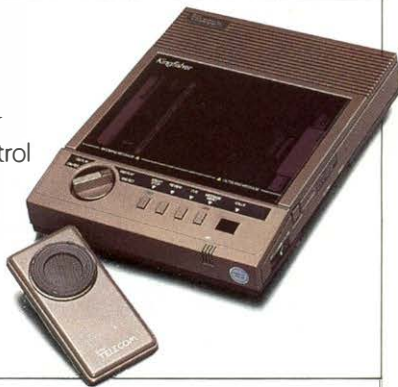

ROBIN

- low-cost with smooth low profile styling
- simple to use
- voice-activated remote interrogation
- cassette, doubler socket and transformer included

KINGFISHER

- twin cassette answering machine
- remote control using bleeper
- call screening • ringer control
- adjustable message length
- electronic message counter
- simple to use
- private messaging facility
- cassettes, transformer and bleeper included

TERN

- remote interrogation using bleeper
- loudspeaker volume control
- call interception monitor
- can be used as a dictation machine

CALLMAKERS

TRENT

- stores up to fifty 18 digit numbers
- battery back-up in case of mains failure
- on-hook dialling
- LED display shows number dialled
- call timer, clock and calendar
- available in light grey, brown or stone

TYNE

- see-at-a-glance index of names
- stores up to fifty 18 digit numbers
- easily changed and updated
- battery back-up in case of mains failure
- available in light grey, brown or stone

DIY

STARTER PACK ONE

Complete kit containing one British Telecom convertor with 15 metres of cable. One extension phone socket. One disposable fitting tool. Fifty cleats.

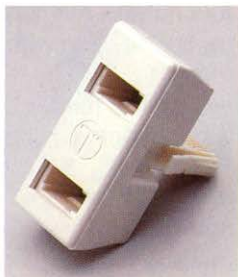

STARTER PACK TWO

Complete kit containing British Telecom convertor with 30 metres of cable. Two extension phone sockets. One disposable fitting tool. One hundred cleats.

PLUG-IN ACCESSORIES

DOUBLER

- enables two products to be run off one phone socket instantly
- add an answering machine or a cordless telephone to your line without having to install more phone sockets
- use with a plug-in tone ringer to boost the volume of your telephone ringing

EXTENSION CORD

- three metres long, doubles the length of your phone line

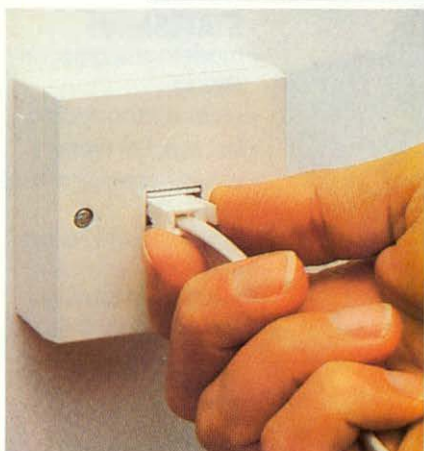

- enables phones to be carried around the room or to the next room
- gives flexibility in the siting of your cordless telephone or home computer modem where power and phone outlets are not adjacent

PLUG IN TONE-RINGER

- can be installed or removed instantly
- inexpensive to buy – no on-going rental
- compact design
- helps you hear when the phone rings wherever you are in the house
- flashing LED gives visual indication of incoming call – useful for the hard of hearing

GENERAL INFORMATION

- nearly all the products in this catalogue are designed to be plugged into British Telecom Phone Sockets
- compact and attractive, Phone Sockets are designed to enable you to plug-in telephone equipment cheaply and instantly
- if you do not have Phone Sockets, or if you want more, please contact your local British Telecom Sales office

If you do not have a new style phone socket, please contact your local British Telecom Sales Office who will arrange conversion of your existing one for a reasonable fee. Further extension sockets can now be added yourself, using the simple to fit range of British Telecom DIY kits, available in most High St., electrical and departmental stores.

Due to British Telecom policy of constant improvement, specifications may vary from those stated in this catalogue. Also shades of colour shown may vary because of printing variations.

APPROVED
for connection
to telecommunication
systems specified in the
instructions for use
subject to the
conditions set out
in them.

PRESS-BUTTON

Electronic press-button dialling for more accurate dialling.

PRIVATE MESSAGING FACILITY

A user can leave a message on his own answering machine for colleagues to pick up with their remote beepers.

RINGER CONTROL

A facility whereby a user can choose how long it takes his answering machine to answer incoming calls.

SECRECY BUTTON

The secrecy button enables you to make private asides with no possibility of the other person on the phone being able to hear you.

TONE CALLER

An electronic bell, often with a volume control.

VISUAL DIGITAL DISPLAY

A discreet digital display showing your clock or illustrating the number you are calling as you dial as appropriate.

WALL BRACKET

Many phones give you the option of having them wall-mounted on a special bracket, an excellent idea when you're short on surface space. Some phones need no bracket.

For further information on any of these products simply call 100 and ask the operator for Freefone Telecom Sales.
