

# Special Range Telephones

# Special Range Telephones

This leaflet describes telephones in the Special Range. These come in a variety of styles, materials and colours, providing a wide choice to suit individual tastes. Special Range Telephones are generally suitable for use on direct exchange lines and simple plan extension arrangements. Other uses and facilities are noted for individual models. They are not, however, compatible with every telephone installation. Further information and details of the applicable additional charges, will be provided upon request from local Telephone Sales Offices.

**The Astrofon** by *Thorn-Ericsson* is a modern light-weight press-button telephone with a black base and choice of body colours in White, Green, Red or Beige for use on direct and shared exchange lines and plan arrangements. Another version, in buff only, is for use on switchboard extensions where recall facilities are required. A bell with a volume-control is incorporated in all cases.

**The Contempra** by *GEC* is a fashionable two-piece telephone with the dial incorporated into the handset. The integral bell has a volume control. This telephone can be used on shared exchange lines and is available in Brown, Orange or Gold.

**The Deltaphone** by *STC* is the well known dial version of the Trimphone with the body and handset covered in Brown coloured genuine leather. This telephone has an adjustable tone caller, and it can be used on shared exchange lines.

**The Candlestick** by *STC* is a dial telephone modelled on an instrument of yesteryear, but made with modern components. It is available in Red, White or Black. There is no bell inside the telephone but one is provided separately without additional charge.

**The Dawn** by *Northern Telecom* is a modern design dial telephone with rounded lines and a low profile which will lend itself to a wide range of decors. The telephone is available in Pale Yellow, Avocado Green or White and the integral bell has a volume control.

**The Deltaphone De Luxe** by *STC* is a luxury press-button Trimphone also with a real leather covering to the body and handset, but with a choice of Red or Green colours. These Deltaphones also have adjustable tone-callers and can be used on shared exchange lines.

**The Ericofon 600** by *Thorn-Ericsson* is a one-piece telephone with a dial set in the base. It is available in Ivory or Orange. A separate bell is provided with this telephone.

**The Classic** by *STC* is a traditional dial telephone modelled on the design of an early Danish instrument. It is constructed mainly of wood and brass and has an integral bell. It is available in Ivory or Black and can be used on shared exchange lines.

**The Mickey Mouse** by *Plessey* is produced by arrangement with Walt Disney Ltd. This colourful character stands on a simulated wood base which contains the dial and an adjustable tone-caller. This telephone may be used on shared exchange lines.

**The Ericofon 700** by *Thorn-Ericsson* is the up-to-the-minute Ericofon design, improved in style and with all electronic circuitry. It has a press-button pad in the base and an integral tone-caller. The telephone is available in Brown, Green or White.

**DLE 504**

Only those telephone instruments which have been provided by British Telecom are permitted to be connected to the UK public switched telephone network.

Please note: We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions, illustrations, and shades of colours shown in this leaflet.
