

# Telex Service

March 1973

Descriptive  
Leaflet

## DLG 1

Index and Charges  
Section G leaflets

This is a simple guide; it is not intended to be a comprehensive list.

Details of call charges and other features of the service are given in General Information leaflet DLX 2.

The full connexion charges are shown, but in certain instances reductions are made.

The rentals also cover maintenance of the equipment.

The basic types of teleprinter mentioned in leaflets DLG 700 and DLG 701, although earlier models, can still be provided if particularly requested.

When a Teleprinter 15 is provided initially on, or added to an installation, or is taken over, there is a single payment charge of £50 for this modern instrument, in addition to the rental and connexion charge.

The charges and rentals shown in this leaflet are correct as at 1st March 1973. The charges and rentals may be revised subsequently by the Post Office.

From 1st April 1973 value added tax will be payable for tele-communications services and will be added to the total of charges on customers' bills.

We do our best to supply our customers with the equipment they ask for, but we may have to provide equipment which does not accord exactly with the descriptions and illustrations in the leaflets mentioned.

leaflet number	description of equipment	connexion charge	quarterly rental
DLG 700	<b>The basic telex installation.</b> A teleprinter 7E and dialling unit on a table which houses the power unit, and a line to an automatic telex exchange.	£15	£40
