

Telex Service

DLG 1

October 1968

Index and Charges

Section G leaflets

PLEASE NOTE

This is a simple guide which is not intended to be a comprehensive list.

Details of call charges and other features of the service are given in General Information leaflet DLX2.

The full connexion charges are shown, but in certain instances reductions are made.

The rentals also cover maintenance of the equipment.

<i>Leaflet Number</i>	<i>Description of Equipment</i>	<i>Connexion Charge</i>			<i>Quarterly Rental</i>		
		£	s	d	£	s	d
DLG 700	The basic telex installation. A teleprinter (7E) and dialling unit on a table which houses the power unit, connected to an automatic telex exchange.	10	0	0	40	0	0
DLG 701	Telex installation with automatic message-transmission facilities. A teleprinter (7ERP) with reperforating attachment, dialling unit, and automatic transmitter, connected to an automatic telex exchange.						
	Teleprinter, dialling unit and table with power unit	10	0	0	57	10	0
	Automatic transmitter	10	0	0	16	5	0
	(If both are provided at the same time)	15	0	0	73	15	0
	Auxiliary equipment More advanced telex installations can use the following items.						
	Printing Reperforator 1 This equipment can be provided instead of the teleprinter with tape reperforator (7ERP) so that messages are produced on paper tape in print and perforation	10	0	0	51	5	0
	Printing Reperforator 2 Can be connected to a telex line in addition to the teleprinter, to produce messages on paper tape in print and perforation.	10	0	0	33	15	0
	Sprocket feed attachment Can be provided where specially printed packs of stationery are to be used by the subscriber	—			1	17	6
	Private meters Can be provided to show the units used on each call, and to give a running total of units used.	—			5	10	0
	"Here is" facility An additional key fitted to the basic installation teleprinter (7E), to automatically send the installation answer-back code.	—			10	0
