

Modern Telephones

# Tablephones! Wallphones! Colourphones!

Features: Coiled extensible handset cord in matching colour. Lightweight handset. Dial in matching colour and with easier-to-read lettering. More compact than ordinary telephones. Improved transmission performance. The bell is contained in the base of the instrument which, including an allowance for

the cords at the rear, occupies a space of  $9\frac{1}{2}'' \times 6''$ . The overall height is  $4\frac{3}{4}''$ . The wall telephone measures  $9\frac{1}{4}''$  in height, is  $10''$  wide, and is  $4\frac{1}{4}''$  deep.

The tablephone has two variants—differences are slight—the one most immediately available will be provided.

You can choose your modern telephone from those illustrated in this leaflet or you may prefer to call at the Telephone Sales Office and make your selection from the complete range on display there.

The address and telephone number of your Telephone Sales Office are given in the preface to your Telephone Directory.
