

Get plugged in

Get plugged in

The telephone is surely the most direct and immediate form of communication there is. And if you don't have one, you're missing out. On keeping in touch. On the latest news. On sheer convenience.

A phone's no longer a luxury. It's a lifeline, it's a loveline, it's a timesaver and it's an essential to present-day living. Once you've got one, you'll wonder how you ever managed without it. You can contact family or friends, usually in a matter of moments, and chat for as long as you wish, whether they're 50 or 5,000 miles away. You can make appointments, ring shops or services, send a telegram, check on train times, even call for help in an emergency. And there's a host of useful extras on the end of the line, from early morning calls to weather forecasts.

What will it cost? Having a phone installed in your home, and the subsequent quarterly bill, may well be less than you imagined. When you think of the advantages, you'll agree it's worth every penny. And, once you've got it, you can keep expenses down if you make full use of the cheaper rates at off peak times.

Residential Connexion Charge £70.

Residential Quarterly Rental £13.50.

Get plugged in to your ideal phone

Never before have we been in the position to offer so many telephones – just browse through this brochure – it's a sure thing that you'll find just the phone you've been looking for.

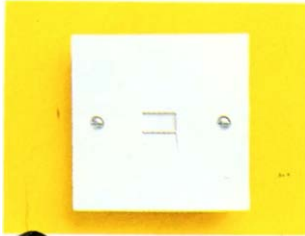

Phone sockets

Freedom of movement

Now, thanks to modern technology, instead of fixing telephones permanently into position we will install plug-in phone sockets wherever you want them in the home.

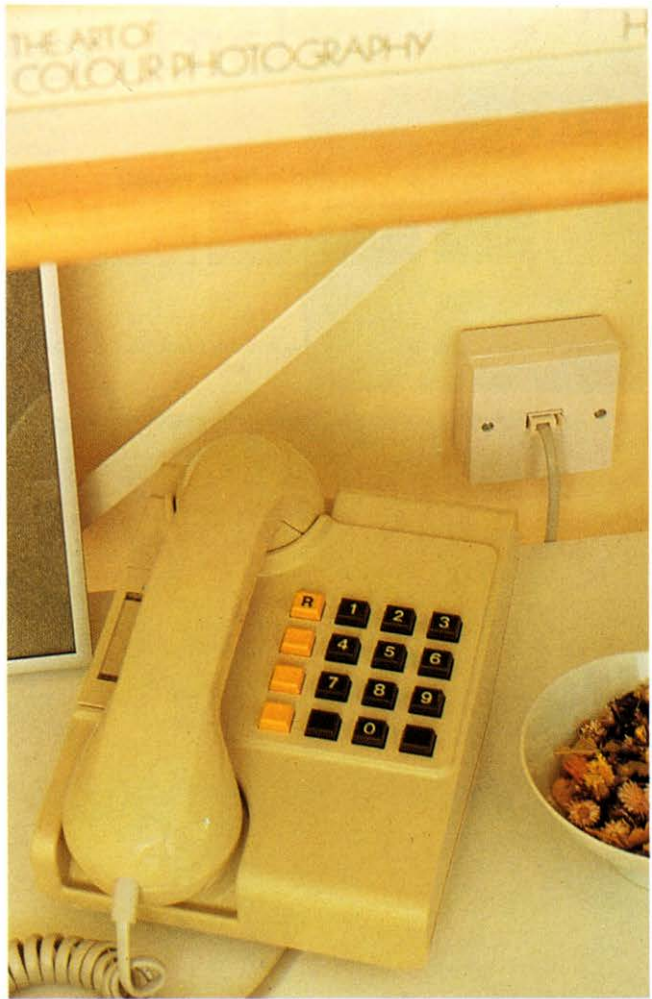

From now on, moving your phone around the home is simple – just unplug it from one socket and plug it into another.

If you've already got a phone and you want to extend it, say to your bedroom, we'll be pleased to fit a phone socket there and supply you with a plug-in phone of your choice (choose from our wide range).

The installation charge for the phone socket will be £25 plus a quarterly rental of 15p. The cost of the phone varies, of course, with the type of phone you choose.

When we fit your

extension phone socket we will convert your existing phone to our new phone socket system at no extra charge.

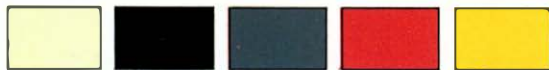

If you decide to have more than one phone socket fitted, we can offer a special reduction. For each socket ordered/fitted, at the same time as the original, you only pay a £10 connexion charge and 15p quarterly rental.

There's never been a better time to get connected.

Please Note.

If an external extension of telephone service is required, say to a garage or workshop, additional charges may apply.

We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions, illustrations and shades of colours shown in this brochure.

Charges shown in this brochure apply to Residential service only and are correct as at 1 November 1981 but may be revised subsequently by British Telecom.

With the exception of purchase prices, all charges shown in this brochure are exclusive of VAT and an amount in respect of VAT will be charged as an addition to customers' bills. The VAT inclusive prices shown in this brochure are at the applicable rate (15% at time of print). Any variation in the VAT rate will be incorporated in any bill rendered.

Telephones are available from other suppliers which may be connected to the British Telecom system. Should you wish to buy one of these we do urge you to make sure that any telephone you do buy is approved for connexion to the public telephone network.

Note: Press button Telephones

Due to the gradual introduction of new equipment throughout the Public Telephone System, customers ordering press button telephones may be provided with either ten or twelve button models, and in some instances a new dial tone. Users of the twelve button models will also hear a 'confidence tone' on depression of the press buttons. This tone varies between press buttons, simply informing the user that the telephone is functioning correctly.

Initially there will be no new facilities provided with the additional buttons, but their introduction is the groundwork for future new customer services. Because of this, no choice will be offered, and there will be no difference in charges.
