Sceptre 100

Tomorrow's phone...today

- Liquid crystal display
- Clock
- Repertory callmaker
- Call-timer
- Read-out of number called
- Repeat-last-number

Sceptre 100, the latest in advanced telephone technology from British Telecom, offers you the features and facilities you've come to expect from life in the '80s. It's slim, elegant appearance, ideally suited for the modern home or office, conceals the microprocessor control which makes Sceptre 100 more than just a 'phone:-

● It's a callmaker: Sceptre can store up to 10 telephone numbers which can be easily and quickly dialled by pressing 2 buttons; and that means savings in time and effort for you. What's more, the LCD will show you the number you are dialling.

● It's a clock: a clock is a necessity and so is a telephone. By combining the two, Sceptre gives you what you need in one space-saving, and attractive, piece.

● It's a timer: If you need to know the length of your calls, press a button when your call starts and the LCD will show you how long your call has lasted.

● It's a trier: Some telephone numbers seem to be permanently engaged, so Sceptre's repeat-last-number facility enables you to re-dial the last manually-dialled number if it is engaged, again saving time and effort.

Sceptre 100 is fitted with the new standard British Telecom plug, and is available in two colour combinations;

TWO-TONE BEIGE
TWO-TONE BLUE

When in use, the telephone is powered from the exchange line; when not in use, the memory and other facilities are maintained by power from 4 alkaline MN 1500 batteries. The batteries have an estimated life of 1 year and are available from most electrical goods retailers.

Please note

We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions, illustrations and shades of colours shown in this leaflet.

Your British Telecom Sales Office will gladly supply any further information or details of any changes in the information in this leaflet since it went to print. The address, telex and telephone numbers are shown in the preface of your Telephone Directory.
