

The Ambassador Collection from British Telecom

Loudspeaking Telephone

The Ambassador collection from British Telecom introduces a new concept in office communications. Modular in design, our range of loudspeaking telephones, answering/recording machines, callmakers and telephones offer the latest technology in neat attractive units – a winning combination which makes for an efficient office without sacrificing style.

Loudspeaking telephones enable you to have both hands free – so you can carry on a telephone conversation while dealing with other immediate matters, whether related to the call or not. They also allow other people around you to join in the conversation.

Accord loudspeaking telephone

The Accord brings you all the benefits of hands-free telephone communication, including making calls, without lifting the handset.

As well as being a loudspeaking telephone the Accord can also be used as a normal telephone.

- Loudspeaking telephone
- Hands-free communication
- Volume control
- Microphone cut-off

Useful information

Several people can join in a telephone conversation using Accord but can only speak one at a

time. Telephone meetings can also be carried out between small groups of people at different premises, using Accord.

A volume control allows the level of incoming speech to be adjusted to suit the user.

Should you wish to make a private remark when the Accord is being used in its loudspeaking mode, the microphone can be disconnected from the circuit so that you will not be overheard.

General Information

Dimensions 372mm x 200mm x 90mm

Weight approx 2.25kgs

Customers must provide a 3-pin socket mains electricity supply of at least 2 amp rating positioned within 3 metres of the Accord.
