Callmakers

The Ambassador collection from British Telecom introduces a new concept in office communications. Our range of telephones, callmakers, answer/recording machines and loudspeaking units, which are all modular in design, offers the latest technology in a neat attractive package—a winning combination which makes for an efficient office without sacrificing style.

Callmakers store the telephone numbers that you use frequently and will dial them for you at the touch of a button. Whether it's your New York office or the local wine bar, dialling is so much easier with a callmaker.

Callmakers are finding a place in more and more businesses throughout the country, and these include our emergency services, financiers and lawyers, banks and travel agents. In fact, anywhere the telephone plays a vital operational role. Can you afford not to have one?

### Tyne Callmaker

The Tyne has the capacity for storing up to 50 telephone numbers each containing a maximum of 18 digits plus 2 access pauses. Each stored telephone number is easily identified and has its own access button. Storing numbers is a simple procedure and changing them is just as easy. To call a number you simply pick up the handset and press the required address button.

- 50 number capacity
- Uses individual address buttons
- Single button calling
- Each number stores up to 18 digits plus 2 access pauses
- Simple operation
- Plug and socket termination
- Standby battery in the event of mains failure to maintain the telephone number store for 72 hours.

### Trent Callmaker

The Trent Callmaker has the same basic facilities as the Tyne but with the following additional benefits: on-hook dialling—this allows you to dial a call without lifting the handset, a monitor loudspeaker keeps you aware of the call's progress and when the call is answered you simply lift the handset to speak; an LED display that shows the number as it is called and once the handset is raised this changes to show a simple call timer in seconds and minutes for the duration of the call: the display will also show a 24 hour clock and calendar when the Trent is not in use.

As Tyne Callmaker plus:

- Telephone number display
- On-hook dialling
- Call progress monitor loudspeaker
- Call timer
- 24 hour clock and date display.

### General Information

Dimensions 173mm x 200mm x 85mm.

Weight 0.75kg for the callmakers and 1kg for the power unit.

Customers must provide a 3-pin socket mains electricity supply of at least 2 amp rating positioned within 3 metres of the Callmaker.

Colour range: (for both Tyne and Trent callmakers)  
Dark Brown, Mid-grey, Stone.

The model shown in the photograph is the Trent—the Tyne is similar in appearance. To order your Trent or Tyne Callmaker, or for further details, please contact your local British Telecom Sales Office. The address and telephone numbers are in the preface of your Telephone Directory.

Please note: We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions and illustrations in this leaflet.
