

THE TRIBUNE

Brilliantly simple

British
TELECOM

Smart, tough and reliable

Polar White

Smart to look at and smart in intelligence—that's the Tribune.

It's one of the most reliable phones you can put your hands on. We've already subjected the Tribune to the toughest tests we can throw at it. Its performance has been second to none.

And don't let the simplicity of the Tribune facade fool you. Developed exclusively for British Telecom, it provides a whole range of sophisticated features that enable you to keep in touch with great ease.

English Red

With its robust exterior, stylish colours and traditional feel, the Tribune displays all the attributes of a phone that's a prime choice in homes throughout Britain.

Charcoal Grey

PRESS-BUTTON OPERATION

Makes the phone more convenient to use and provides automatic services quickly at the touch of a button.

YOUR SECRET'S SAFE

Hold this Secrecy button down and you can speak to other people in the room and make remarks without being overheard by your caller.

It's a lot more effective than putting your hand over the mouthpiece as the microphone in the Tribune is very sensitive and will pick up your every word.

NUMBER ENGAGED?

No problem. No need to waste time dialling the whole number again. Simply press this Last Number Redial button and the Tribune will try it again for you.

CHOICE OF BELL OR TONE CALLER

The Tribune is available with a bell or tone caller. Why not have two different models of the Tribune? Then you can distinguish which phone is ringing. This would be especially useful in offices.

SET THE VOLUME

You can adjust the volume of the ringing tone or bell to suit your circumstances. Set it high if you're going to be some distance from the Tribune and don't want to miss a call, or low if you don't want to wake the children.

THE PHONE FOR THE FUTURE

The Tribune is a dual signalling phone which means that by using * and # buttons, you'll be able to switch on to exciting new telephone services. And when your local exchange is modernised you simply flick a switch to convert it to the much faster tone-signalling system.

SPECIAL OPTION FOR HARD OF HEARING PEOPLE

If you wear a post aural hearing aid, you'll benefit from a Tribune fitted with an inductive coupler—available on the bell model only, at no extra cost.

The inductive coupler within the earpiece reduces background noise and improves the clarity of the incoming speech. All you have to do, when using your specially adapted Tribune, is switch your hearing aid to the T position—and then go ahead with your conversation.

The advantages of renting the Tribune

You can have Tribune right now, and without having to find the money to buy it. Simply tell us that you wish to rent one and the appropriate charges will appear on your phone bill each quarter.

Another major advantage of renting is that, because the phone remains our property, we keep it in good working order for you.

If you prefer you can, of course, buy your new Tribune from your local British Telecom Sales Office or British Telecom Shop.

All British Telecom phones are supplied with a 12 month guarantee when purchased.

The mark of quality

When it comes to phones, there's one name to insist on — British Telecom. That's the certain way to ensure quality, style and service. So don't just look for the green 'approved' circle, look for the British Telecom name or symbol too.

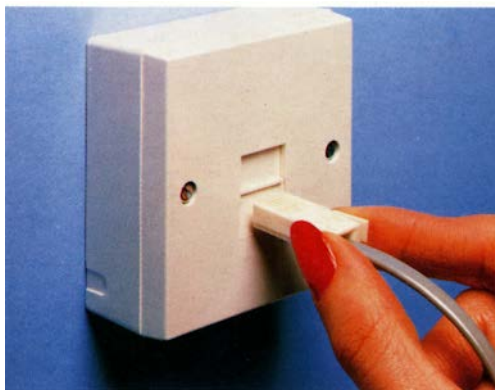

Freedom & flexibility with today's sockets

Like all modern phones, the Tribune is designed to plug straight into one of the new-style phone sockets.

Phone sockets can be quickly and cheaply installed just about anywhere. And because you can literally plug the phone in wherever there's a socket, you can move it around to suit yourself.

If you don't already have modern phone sockets, that's easily remedied. Just contact your local British Telecom Sales Office. They will take care of the details, and the cost of socketing will be added to your next telephone bill.

Once you have a modern master socket fitted, more sockets can be added whenever you wish, either by British Telecom or by purchasing a DIY Extension Socket Kit (British Telecom's range of DIY kits is widely available).

To rent or buy, simply contact your local British Telecom Sales Office by dialling 100 and asking for FREEFONE TELECOM SALES, or visit your nearest British Telecom Shop.
