Dialling Instructions and Call Charges

For telephones **WITHOUT** a coin box

BATH

Subscriber Trunk Dialling Instructions and Call Charges

WHAT TO DIAL

¶ For an exchange shown on the following pages,
dial the code and then the number you want

For ALL-FIGURE numbers (those which have no exchange name),
dial all the figures

For any other exchange, dial 100 for the operator

WHAT IT COSTS

¶ Details of call charges are shown on page 19

When you make a call

First check the code (if any) and number

Lift the receiver and listen for dialling tone
(a continuous purring)

Dial carefully and allow the dial to return
freely

Then wait for another tone:

Ringling tone (burr-burr) the number is
being called

Engaged tone (a repeated single note) try
again a few minutes later

Number unobtainable tone (steady note)
replace receiver, re-check the code and/
or number, and then re-dial

After dialling a trunk call there will be
a pause before you hear a tone; during
this time the trunk equipment will be
connecting your call

At the end of the call, replace the receiver
securely because timing of calls stops when
the caller hangs up

When you answer the telephone

Always give your name or telephone
number

If you hear a series of rapid pips, the call
is coming from a coin box telephone of
the new type. Wait until the pips stop and
then give your name or telephone number

How to get the best from STD

STD is quicker and cheaper, so dial as
many of your calls as you can

Maintain in your Personal Telephone
Directory an up-to-date list of dialling
codes and/or numbers of people you are
likely to call. This will save you time in
the future.

When you dial, don't pause too long
between digits.

If the number you want is engaged, wait
a few minutes before dialling again.

Ask for the extension number on calls to a
private exchange; this will save you time
and money. If the extension you want is
engaged it will usually pay, on an STD
call, to clear and try again later

Remember, it costs only a few pence to
dial a call to find out if the person you
want is there; this is cheaper than paying
for a personal call via the operator

If you hear a recorded announcement
telling you that the trunk lines are en-
gaged, replace the receiver and try again
later

Answer your telephone promptly, giving
your name or telephone number. This
saves time and money and helps the caller

Be sure your telephone arrangements are
adequate. The Telephone Manager will
always be pleased to give advice

Ask your enquiry operator (dial 191) if
you require another copy of the Personal
Directory or this Dialling Instruction
Booklet

TRUNK CALLS VIA THE OPERATOR

¶ For any **OTHER** exchange dial **100**:
ask the operator for the exchange and number you want:
quote your own exchange and number

Call Charges

Most trunk calls are cheaper if you dial them. When a dialled call is answered, your meter at the exchange registers once. This records one unit of time and each unit costs 2d. The meter registers again as each new time unit begins. There will be no time pips on dialled calls.

TRUNK CALLS CONNECTED BY THE OPERATOR

The call charges shown in the last three columns above apply to all trunk calls connected by the operator for any reason.

The charge for each extra minute, or part of a minute, beyond three minutes, is one-third of the rate shown.

*These rates may be suspended on certain days at Christmas and New Year
