Dialling  
Instructions

# Dialling ALL-FIGURE TELEPHONE NUMBERS

---

When dialling, from this telephone, a  
LONDON all-figure number

e.g. 01-222 2870

dial only

the last seven figures

those after the hyphen

---

**REMEMBER,  
DO NOT DIAL THE  
01-**

# Subscriber Trunk Dialling and Call Charges

---

## WHAT TO DIAL

¶ For an exchange shown on the following pages,  
dial the code and then the number you want

For ALL-FIGURE Numbers (those which have no exchange name)  
see pages 5 and 6

For any other exchange, dial 100 for the operator

## WHAT IT COSTS

¶ Details of call charges are shown on page 3

---

### When you make a call

**First check the code (if any) and number**

Lift the receiver and listen for dialling  
tone (a continuous purring)

Dial carefully and allow the dial to return  
freely

Then wait for another tone:

*Ringing tone (burr-burr)* the number is  
being called

*Engaged tone (a repeated single note)*  
try again a few minutes later

*Number unobtainable tone (steady note)*  
replace receiver, re-check the code and  
number, and then re-dial

After dialling a trunk call there will be  
a pause before you hear a tone; during  
this time the trunk equipment will be  
connecting your call

At the end of the call, replace the receiver  
securely because timing of calls stops  
when the caller hangs up

### When you answer the telephone

Always give your name or telephone  
number

If you hear a series of rapid pips, the call  
is coming from a coin box telephone.  
Wait until the pips stop and then give your  
name or telephone number

### How to get the best from STD

STD is quicker and cheaper, so dial as  
many of your calls as you can

Maintain in your Personal Telephone  
Directory an up-to-date list of dialling  
codes and/or numbers of people you are  
likely to call. This will save you time in  
the future

When you dial, don't pause too long  
between digits

If the number you want is engaged, wait  
a few minutes before dialling again

Ask for the extension number on calls to a  
private exchange; this will save you time  
and money. If the extension you want is  
engaged it will usually pay, on an STD  
call, to clear and try again later

Remember, it costs only a few pence to  
dial a call to find out if the person you  
want is there; this is cheaper than paying  
for a personal call via the operator

If you hear a recorded announcement  
telling you that the trunk lines are en-  
gaged, replace the receiver and try again  
later

Answer your telephone promptly, giving  
your name or telephone number. This  
saves time and money and helps the caller

Be sure your telephone arrangements are  
adequate. The Telephone Manager will  
always be pleased to give advice

Ask your enquiry operator (dial 191) if  
you require another copy of the Personal  
Directory or this Dialling Instruction  
Booklet

# Call Charges

Nearly all trunk calls are cheaper if you dial them. For both local and dialled trunk calls you buy telephone time in twopennyworths, the amount of time bought for 2d. depending upon the distance of the call. When a dialled call is answered, your meter at the exchange registers once. This records one unit of time and each unit costs 2d. The meter registers again as each new time unit begins. There will be no time pips on dialled calls.

## LOCAL CALLS (Dialled or connected by the operator)

Time bought for 2d. Full rate 6 minutes. Cheap rate 12 minutes.

## TRUNK CALLS

Calls you dial yourself

Time bought for 2d.

Calls you dial yourself			Distance in miles	Calls connected by the operator 3 minute call (minimum charge)	
Full rate	Cheap rate	Charge letter used in the list of codes		Full rate	Cheap rate
30 secs.	60 secs.	a	Up to 35	s. d. 1 0	s. d. 1 9
15 "	30 "	b	35 to 50	2 0	1 3
10 "	20 "	c	50 to 75	3 0	1 9
			75 to 125	3 6	2 3
			over 125	4 0	2 3

## TRUNK CALLS CONNECTED BY THE OPERATOR

The call charges shown in the last two columns above apply to all trunk calls connected by the operator for any reason.

The charge for each extra minute, or part of a minute, beyond three minutes, is one-third of the rate shown.

### Cheap rate periods

6 p.m. to 6 a.m. every night and all day Sunday.

The cheap rate may be suspended on certain days at Christmas and New Year.

### Subscribers' meters

Subscribers' dialled trunk calls are recorded at the exchange on the same meters used for recording local calls. These meters are extremely reliable and are regularly tested. You can have a demonstration of how trunk and local calls are recorded, if you care to visit the exchange. Dial 191

to make an appointment. Private meters, which work in step with those at telephone exchanges, can be rented by subscribers who wish to assess costs of individual calls as they are made. Details can be obtained from the Telephone Manager.

### Personal and transferred charge calls

With STD it costs only a few pence to dial a trunk call and ask for the person you want or to arrange for him to ring you back and this may be cheaper than the normal Personal or Transferred Charge Call services. You can, however, if you prefer, still obtain these services via the operator by dialling 100.

# Dialling LOCAL Calls

For an ALL-FIGURE Number in LONDON, that is a number starting with '01-', dial only the last seven figures, those after the hyphen, e.g. for 01-992 4321 dial 992 4321

NOTE: Calls to all other ALL-FIGURE Numbers are TRUNK calls—see page 8

For a number including one of the exchange names shown below, dial the code, then the number you want

e.g. for Caterham 42235 dial 22 42235

*For a starred exchange\* dial the code only and ask the operator for the exchange and number you want*

	Code		Code		Code

## TRUNK CALLS VIA THE OPERATOR

For any other exchange dial 100;  
ask the operator for the exchange and number you want;  
and quote your own telephone number

# INTERNATIONAL Subscriber Dialling

---

## Dialling to the Continent

You can dial for yourself calls to most places in Belgium, France, Germany, Luxembourg, the Netherlands and Switzerland.

### What to dial

The chief exchanges to which you can dial direct are shown in the following list, but there are many others. You dial the code shown against the exchange and then the subscriber's number. For example, for a call to Marseilles you dial **010 33 91** and then the subscriber's number (but see NOTE below). If you wish to know the code for a place which is not shown ask the Continental Exchange operator. (To speak to the Continental Exchange operator dial **104** for France or Switzerland or **105** for Belgium, Germany, Italy, Luxembourg, the Netherlands and Norway). Please enter the code in your Personal Telephone Directory if you are likely to need it again.

NOTE: On the Continent telephone numbers are sometimes written and quoted, without a place name, in various forms, such as:

020-949999, (020)949999, (0)20 949999.  
When dialling such a number from this country, first dial the code from the following list for the country you want.

Belgium	010 32
West Germany	010 49
Italy	010 39
Luxembourg	010 352
The Netherlands	010 31
Norway	010 47
Switzerland	010 41

Follow this with the number which has been quoted to you in one of the forms shown above, but disregarded the **0** at the beginning, whether or not this **0** is in brackets, and dial the rest of the number. Thus, if the number mentioned in the example was in Holland you would dial this: **010 31 20 949999**. To dial numbers in France, first ascertain the code for the place concerned and dial this, followed by the local telephone number in full, including any initial **0**

### Continental tones

**Ring tone** in Continental countries is a medium pitched tone. Its speed varies from country to country but the bursts of tone are always evenly spaced with quite long pauses between them. It is unlike the British ringing tone.

**Engaged tone** in Continental countries is also medium pitched. Although its speed varies from country to country it is always much faster than ringing tone. In some countries it is rather similar to British engaged tone; in others, very much faster.

Other special tones and recorded announcements are used in some Continental countries.

For a free demonstration of tones:

dial **283 0811**

### What it costs

The charge is shown under each country.

## How to get the best from ISD

The hints at the beginning of this booklet on "How to get the best from STD" apply equally to calls to the Continent. In addition:

When dialling to the Continent don't pause more than two or three seconds between digits, especially the last few digits. The call may fail if you do. It helps to write down the whole code and number before you dial.

You will often hear nothing for half a minute or a little longer after dialling. Do not replace the receiver before you have given the equipment time to connect the call.

On calls to France you may sometimes hear a series of very rapid pips. This tells you that the automatic equipment in France is putting your call through and asks you to hold on.

## Calls connected by the operator

Should you want the operator to get your call dial 104 for France and Switzerland or 105 for Belgium, Germany, Italy, Luxembourg, the Netherlands and Norway. The three minute minimum charge applies on all calls made through the operator.

# DIALLING CODES for exchanges on the Continent

When dialling do not pause at the spaces in the codes.
