

SUBSCRIBER TRUNK DIALLING

Dialling codes and call charges

For telephones WITHOUT a coin box

READING

1965

Subscriber Trunk Dialling Codes and Call Charges

WHAT TO DIAL

¶ For an exchange shown on the following pages, dial the code and then the number you want for any other exchange, dial **100** for the operator

WHAT IT COSTS

¶ Details of call charges are shown on page 2

When you make a call

First check the code and number

Lift the receiver and **listen for dialling tone** (a continuous purring)

Dial carefully and allow the dial to return freely

Then wait for another tone:

Ringing tone (burr-burr) the number is being called

Engaged tone (slow pips) try again a few minutes later

Number unobtainable tone (steady note) replace receiver, re-check the code and number, and then re-dial

After dialling a trunk call there will be a pause before you hear a tone; during this time the trunk equipment will be connecting your call

At the end of the call, replace the receiver securely because timing of calls stops when the caller hangs up

When you answer the telephone

Always give your name or telephone number

If you hear a series of rapid pips, the call is coming from a coin box telephone of the new type. Wait until the pips stop and then give your name or telephone number

How to get the best from STD

STD is quicker and cheaper, so dial as many of your calls as you can

Enter in your Personal Telephone Directory the names, dialling codes and numbers of people you call regularly; this will save you time in the future

When you dial, **don't pause too long** between digits. Distinguish between the letter **I** and the figure **1**

If the number you want is engaged, wait a few minutes before dialling again

Ask for the extension number on calls to a private exchange; this will save you time and money. If the extension you want is engaged it will usually pay, on an STD call, to clear and try again later

Remember, it costs only a few pence to dial a call to find out if the person you want is there; this is cheaper than paying for a personal call via the operator

If you hear a recorded announcement telling you that the trunk lines are engaged, replace the receiver and try again later

Answer your telephone promptly, giving your name or telephone number. This saves time and money and helps the caller

Be sure your telephone arrangements are adequate. The Telephone Manager will always be pleased to give advice

Ask your enquiry operator (dial **191**) if you require another copy of the Personal Directory or this Dialling Code Booklet

Call Charges

Nearly all trunk calls are cheaper if you dial them. For both local and dialled trunk calls you buy telephone time in twopennyworths, the amount of time bought for 2d. depending upon the distance of the call. When a dialled call is answered, your meter at the exchange registers once. This records one unit of time and each unit costs 2d. The meter registers again as each new time unit begins. There will be no time pips on dialled calls.

LOCAL CALLS Dialled or connected by the operator

Time bought for 2d. Full rate 6 minutes. Cheap rate 12 minutes.

TRUNK CALLS

Calls you dial yourself
Time bought for 2d.

Calls connected by the operator
3 minute call (minimum charge)

Full rate	Cheap rate	Charge letter used in the list of codes	Distance in miles	Calls connected by the operator	
				Full rate	Cheap rate
30 secs.	45 secs.	a	Up to 35	s. d. 1 0	s. d. 9
15 "	22½ "	b	35 to 50	2 0	1 3
			50 to 75	3 0	2 0
10 "	15 "	c	75 to 125	3 6	2 3
			over 125	4 0	2 3

TRUNK CALLS CONNECTED BY THE OPERATOR

The call charges shown in the last two columns above apply to all trunk calls connected by the operator for any reason. The charge for each extra minute, beyond three minutes, is one-third of the rate shown.

Cheap rate periods

6 p.m. to 6 a.m. every night and all day Sunday. The cheap rates may be suspended on certain days at Christmas and New Year.

Subscribers' meters

Subscribers' dialled trunk calls are recorded at the exchange on the same meters used for recording local calls. These meters are extremely reliable and are regularly tested. You can have a demonstration of how trunk and local calls are recorded, if you care to visit the exchange. Dial Reading 52663 to make an appointment. Private

Meters, which work in step with those at telephone exchanges, can be rented by subscribers who wish to assess costs of individual calls as they are made. Details can be obtained from the Telephone Manager.

Personal and transferred charge calls

With STD it costs only a few pence to dial a trunk call and ask for the person you want or to arrange for him to ring you back and this may be cheaper than the normal Personal or Transferred Charge Call services. You can, however, if you prefer, still obtain these services via the operator by dialling 100.

LOCAL Dialling Codes

READING EXCHANGE

☐ For a subscriber on READING exchange dial only the number you want

LOCAL EXCHANGES

☐ For a local exchange shown below, dial the code, then the number you want
e.g. for Wallingford **2199**; dial **923 2199**

SERVICES

available from
your telephone

Dial

Emergency Calls **999**

† Dial '100' for the present. Operator charge applies. The operator will tell you when you can dial the call yourself at the STD rates.

TRUNK CALLS VIA THE OPERATOR

- ¶ For any other exchange dial 100;
- ask the operator for the exchange and number you want;
- quote your own exchange and number

The STD Code System

To make an STD call you dial a code followed by the number you want. The code for a trunk call is a series of letters and figures which identify the called exchange.

An STD code always starts with "0" to connect you to the trunk equipment.

For trunk calls to London the next figure is "1". On trunk calls to London you dial "01" followed by the first three letters of the exchange name and the number you want. Thus for

London CENTral 7890
dial 01 CEN 7890

There are five other cities where letters are already used for dialling local calls. For trunk calls to these cities, the first three figures of the code are Birmingham 021, Edinburgh 031, Glasgow 041, Liverpool 051, Manchester 061. Thus for

Edinburgh WAVErley 1234
dial 031 WAV 1234

For other large towns the "0" is followed by two letters, generally the first two letters of the name and then a figure. Thus for

Leeds 23609 and for Leicester 23609
dial 0LE 2 23609 dial 0LE 3 23609

The figure at the end of the code distinguishes between names which start with the same two letters or with letters having the same position on the dial. For smaller towns, the code letters are sometimes taken from the name of a large town nearby, or the district, or county name, and may be followed by up to three figures.

The exchanges you can dial, the codes to be used and the call charges are given in this booklet.
