RHAPSODY ELITE

THE SWITCHING SYSTEM THAT

The Rhapsody Elite Switching System has been specially designed for the small business with its sights on improved communications and thus greater business efficiency.

With its 3 line and 6 extension capacity, it's not only perfect for the small firm but ideal working as a satellite station from a PABX switchboard.

Which means it can be used by a small autonomous unit or department within a large organisation, or by a high-ranking executive who needs his own system.

CALL FOR ONE, ONE FOR ALL.

With a Rhapsody Elite all extensions can have immediate access to all lines for either incoming or outgoing calls.

This is ideal when people are busy or someone's trying to run the office single-handed—like at lunchtime, or after hours.

HOLD IT A MINUTE PLEASE.

Every call can be transferred between extensions.

You can intercept and hold too, if someone's busy, or to enquire whether it's convenient to accept the call.

So a secretary can take all her boss's calls passing on only those which are wanted.

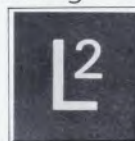

An intercom with a buzzer allows for full boss/secretary operation.

And, when you're already in conversation, an internal tone lets you know an outside call is pending—no lost calls, no lost business.

TALKING TO EVERYONE.

With Rhapsody Elite you're really talking—to everyone at once.

For instance you can choose to answer an external call even when you're engaged on another line.

Or you can consult a colleague on another extension and then return to your original call.

In fact, you can alternate between a maximum of 3 external and 2 internal extensions.

There's even a conference calling facility to enable meetings to be held whenever you wish.

ONE TWO AND YOU'RE THROUGH.

Last number re-dial is a Rhapsody feature which saves you the trouble of re-dialling an engaged external number.

Just press a few buttons and the number's dialled for you.

You can also store your most heavily-used number for abbreviated dialling.

RHAPSODY ELITE. INPHON

WHAT GETS EVERYONE TALKING.

TAKE A CARD.

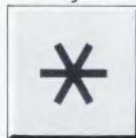

With the addition of a special electronic card, quickly and simply inserted by an engineer, you can augment the Rhapsody Elite's impressive range of functions to include

4 types of call diversion (4 options) enabling the user's telephone to be answered by other extensions.

Abbreviated dialling of up to 99 programmable numbers, saving time and reducing the risk of wrong dialling.

Full lamp signalling – which shows which exchange lines are busy, so you can check when you want to make a call – means you get through first time, every time. (With the Rhapsody special terminal you can even see which extensions on the system are free or busy!)

 Message sending which enables the user to indicate his number on an engaged terminal inviting a call back, reducing the need to keep re-dialling an engaged number.

Call-barring enabling certain types of calls to be prevented (e.g. international, all numbers except those present on the abbreviated dialling list), thereby keeping costs down.

MF signalling enabling faster dialling and * and # functions to be used to get hold of the features of a larger PABX system.

Music (or recorded message) on hold to keep callers amused while their enquiry is being dealt with, plus a public address calling capability.

There are two styles available. One features lamp signalling on exchange lines only, the other has full lamp signalling on exchange lines and extensions. Both help you stay in touch with the call status on other lines.

Each stylish extension is connected to the central control unit by means of a thin cable.

Rhapsody Elite's central control unit is housed in a sleek ultra-modern dark brown case which is wall-mounted and measures just 350mm x 560mm x 110mm.

It is mains powered from a three-pin socket outlet of at least three amp rating, provided by the customer.

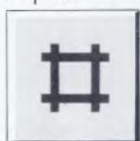

SOUNDS GOOD, LOOKS BETTER.

The Rhapsody Elite terminals can be used as either conventional desk-top telephones or wall-mounted extensions.

All will plug-in and plug-out, using new-style Inphone sockets for maximum mobility.

Available in a cool ivory, to blend with most office environments.

INTERESTED?

To find out more about the Rhapsody Elite and its availability, contact your local British Telecom Sales Office who will gladly supply any further information or details of any changes in the information in this leaflet since it went to print.

The address, telex and phone numbers are shown in the preface of your telephone directory.
