

## Loudspeaking Telephone 4E (Conference-Modified)

This LST4E has been modified to permit omni-directional use at small conferences or by an individual moving around the desk.

## General

This leaflet should be read in conjunction with DLE512, which gives a full description of the operation and facilities of the range of LST4 Loudspeaking Telephones.

## Description

The microphone and its 'OFF' button have been repositioned to the top cover of the LST4E. The loudspeaker has also been repositioned to the base of the instrument. The LST4E (CM) is approximately the same weight and size as the other LST4 instruments.

## Facilities

The omni-directional microphone allows the LST4E (CM) to be positioned centrally on a table for conference use. The other facilities are the same as the LST4E, except that the third volume control button is non-locking. Its operation also disconnects the microphone.

## Additional conference facility

An additional microphone and loudspeaker can be connected to the LST4E (CM) if desired. Additional charges will apply for this arrangement.

## Special notes

The Conference-Modified Loudspeaking Telephone is primarily intended for use by small groups seated around a table and it works best under the same conditions as a standard LST4.

Advice on suitable accommodation and siting can be obtained from your local Telephone Sales Office.

### Please note

We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions and illustrations in this leaflet.

**Your Telephone Sales Office will gladly supply any further information or details of any changes in the information in this leaflet since it went to print. The address and telephone number are shown in the preface of your Telephone Directory. Information on a wide range of our services and apparatus is contained in the Green Pages section of most Telephone Directories.**
