

# TWO PLANS TO EXPAND YOUR BUSINESS

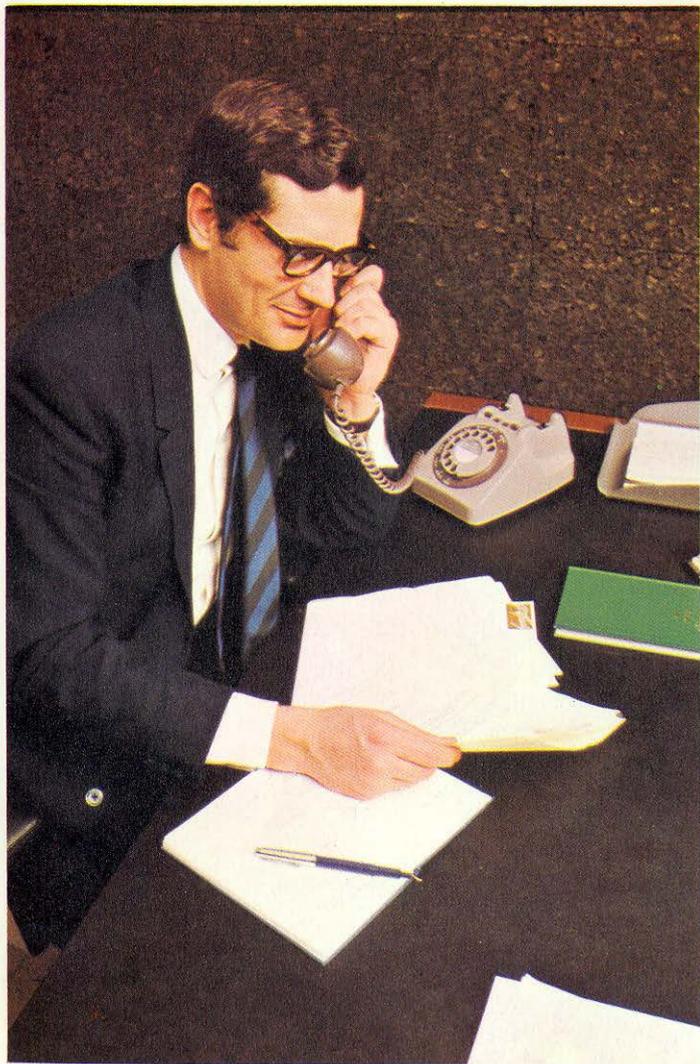

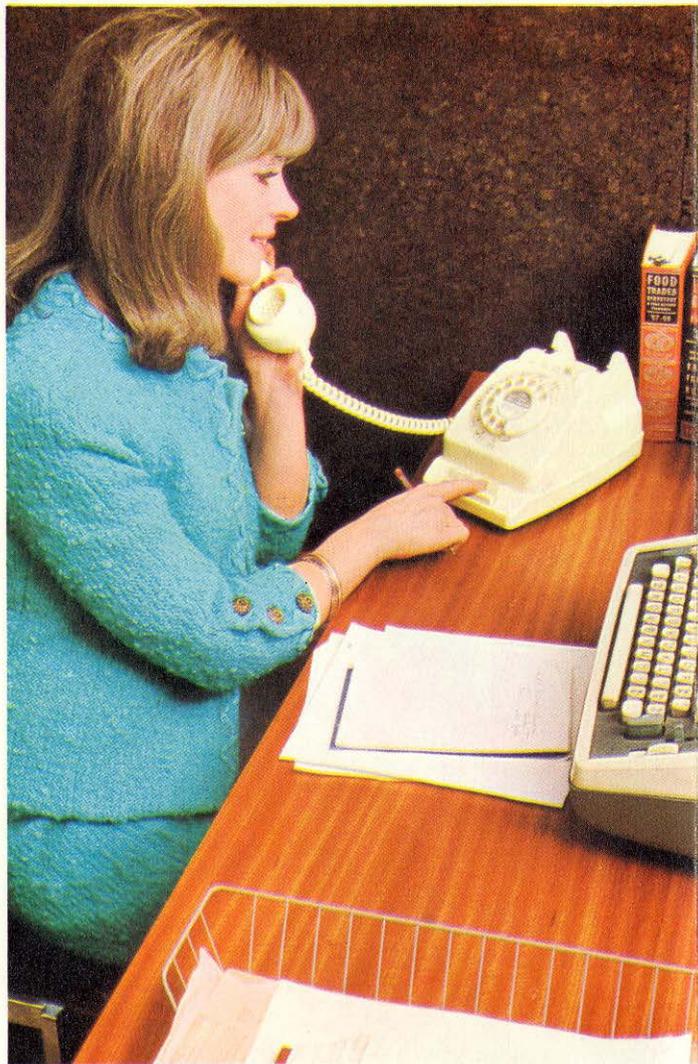

The Plan 105 / 107 is the ideal installation for the shopkeeper who needs to communicate with the flat over the shop or with the stockroom. No need to leave the counter to speak to your wife or assistant. An extension with two-way internal communication will give you security – make life easier. Counter space is precious for display and selling – a wall mounted telephone in the shop will help keep your counter space clear.

## ideal for the shopkeeper

The Plan 105/107 is right for the business where a secretary filters calls for one or two executives. Extensions with two-way internal communication will increase efficiency and add convenience to a well run office. Instant communication with your secretary or assistant can increase your productivity and save time.

## just right for the office

## FACILITIES

- 1** Calls are normally received at the main telephone and can be extended to either extension.
- 2** The line can be left switched through to the extensions for incoming and outgoing calls when the main is unattended.
- 3** The main telephone can hold an exchange call and speak to an extension in private. A red lamp glows at the main to show that an exchange call is being held.
- 4** The main can call and speak to either extension and extensions can call and speak to the main.
- 5** Plan 105 extensions can call and speak to each other without assistance from the main.
- 6** Extensions can be connected to the exchange by the main.
- 7** A choice of colour for all instruments.
- 8** Both the main and extension telephones are available as table or wall mounted models.

**107**

To keep ahead and be successful any business has to offer an efficient service when it comes to handling telephone calls.

Two plans exist to give any small business a greater flexibility and the facility to cope easily and efficiently with their telephone business. At the same time they provide an excellent free private intercom system.

# greater efficiency - less effort.

You gain the benefit  
of telephones  
in separate places – but  
controlled from a main  
telephone with one extension

**plan 107**

or two extensions

**plan 105**

If you would like to rent a Plan 105 or Plan 107, or would like further information about them, get in touch with the Sales Division of your Telephone Manager's office – the address and telephone number are in the preface of your directory.

We can help you on any telephone problem and will be pleased to discuss your own particular needs.
