

Choice of colours

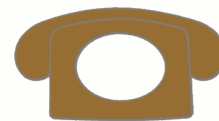

You can choose from three attractive colours so that your 'Compact' will fit in with your decor. Those colours are: light grey, bright blue or mid-brown.

Light grey

Bright blue

Mid-brown

The 'Compact' which can be used as a main telephone, can also be provided on most extensions so you can extend your telephone service around the home.

Your local Telephone Sales Office will be pleased to tell you more about the 'Compact' and give you details of the telephone extension arrangements it can be associated with. The address and telephone number are shown in the preface of your Telephone Directory.

Please note:
We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions and illustrations in this leaflet.

Post Office Telecommunications

PH 2431 (2/80)

Printed by James Upton Ltd., England

Now here's a telephone which is designed to fit happily on shelves and window sills...or leave you more room when it sits on a desk or table top.

This versatile space-saving telephone is called the

Compact

Not only does the 'Compact' give you a wider choice as to where you can have your telephone, there is also a bell volume control which you can adjust to suit its location.

Space-saving

The 'Compact' telephone is much smaller than a standard telephone.

Bell volume control

This enables you to adjust the volume of the telephone bell which is useful for example when there is sickness at home.

Mobility

Because the 'Compact' telephone is lighter than standard telephones and has a cord that will extend up to 3 metres, you can enjoy your phone conversation virtually anywhere in a room.

Wall-mounted version

The wall-mounted version of the 'Compact' is ideal for the kitchen, hall, or anywhere surfaces need to be kept clear. The 'Compact' telephone then rests on its own neat little shelf unit which also incorporates the bell-unit.

Separate bell-unit

The bell-unit (which incorporates the bell volume control) is separate from the 'Compact' telephone and is normally fitted nearby on a wall. However, for an extra charge, the bell-unit can be placed a greater distance from the 'Compact' telephone.
