

Post Office Telecommunications

Loudspeaking Telephones for the '80s

HARMONY LOUDSPEAKING UNIT

Harmony can be associated with any telephone to 'convert' it into a loudspeaking telephone.

The Unit is not currently available and will be undergoing field trials in certain parts of East Anglia during the latter part of 1980.

LOUDSPEAKING TELEPHONE No. 8 (LST 8)

The latest loudspeaking telephone suitable for use with all types of PBX equipment. The LST 8 is not currently available and will be undergoing a limited field trial during late 1980/early 1981 before being introduced on a phased national basis.

Both 'Harmony' and the LST 8 are available in light grey, mid-grey and dark brown.

The descriptions of 'Harmony' and LST 8 in this leaflet are given in good faith but since development is a continuing process they cannot be regarded as binding.
