The Ericofon 700 by Thorn-Ericsson

The Ericofon 700 is the world's first solid-state, one-piece telephone.

It's compact, light and distinctive in design with a pleasant electronic calling-tone.

This new telephone, with its unique positioning of press-buttons under the base, can be installed as a main telephone, or in most home situations, as an extension. Available in three colours: white, green or brown, the Ericofon 700 will blend in with most room settings and colour schemes.

The Ericofon 700, manufactured by Thorn-Ericsson Telecommunications (Sales) Ltd., is installed and maintained by British Telecom.

Call your local British Telecom Sales Office for further details of the Ericofon 700. The address and telephone number are shown in the preface of your Telephone Directory.

For charges see separate leaflet.
